

## **Martek Power is IRIS certified**

February 2011 --Martek Power, a world leader in the design and manufacture of power supplies and power converters, is pleased to announce the IRIS certification of its French subsidiary.

The international IRIS standard (International Railway Industry Standard) was created in May 2006 by the UNIFE association (Association of European Railway Industries) with the support of major manufacturers such as Alstom Transport, Bombardier Transportation, Siemens Transportation Systems, AnsaldoBreda... Based on ISO 9001, the IRIS standard takes into account the specific requirements of the railway industry.

This IRIS certification acknowledges the high quality level of Martek Power which, for over 20 years, has been supplying the train, tramways and metro manufacturers, tier 1 or tier 2 suppliers as well as to the national operating railway companies.

René Clédassou, President of Martek Power Europe commented : “ With the ISO9001 certification, ISOTS16949 for the automotive industry, EN9100 for the aerospace field, ISO14001 for the environment and now the IRIS for the railway sector, Martek Power is recognized for its power conversion expertise in all its major markets. This will allow us to continue our steady growth especially in export markets.”

### **About Martek Power**

Martek Power is a world leader in the design and manufacture of standard, modified-standard, and custom power supplies and converters. With design and manufacturing centers in Europe, North America, North Africa, and Asia, Martek Power is uniquely qualified to satisfy customers in worldwide markets with local technical and customer service support. The company has over 45 years' experience supporting OEMs to engage in aerospace, military, railway, automotive, medical, telecom and networking, data storage and computing, instrumentation, and other industrial applications.
